Quality Policy

We believe, the only way to go forward, is to strive on Quality, Quality Product along with Quality Packaging & Timely Delivery. In quality front, we don't compromise even a bit on the quality of raw material, the best grades of every raw material is used. Every batch is tested for Tensile, Elongation & Bursting Pressure, Once the Hoses are manufactured, they undergoes three screening processes, where they are thoroughly checked for any manufacturing defect.

Following tests are carried out in the laboratory:

- 1) Tensile & Elongation testing machine
- 2) Ageing Oven : Change in tensile and elongation after ageing
- 3) Rheometer : Quality of rubber compound is checked
- 4) Bursting Pressure Testing Machine
- 5) Muffle Furnace : To check the Ash content level
- 6) Specific Gravity
- 7) Hardness tester
- 8) Compression Set
