Quality Policy

We believe , the only way to go forward, is to strive on Quality, Quality Product along with Quality Packaging & Timely Delivery. In quality front, we don't compromise even a bit on the quality of raw material, the best grades of every raw material is used. Every batch is tested for Tensile, Elongation & Bursting Pressure, Once the Hoses are manufactured, they undergoes three screening processes, where they are thoroughly checked for any manufacturing defect.

Following tests are carried out in the laboratory:

1) Tensile & Elongation testing machine
2) Ageing Oven : Change in tensile and elongation after ageing
3) Rheometer : Quality of rubber compound is checked
4) Bursting Pressure Testing Machine
5) Muffle Furnace : To check the Ash content level
6) Specific Gravity
7) Hardness tester
8) Compression Set
